

Accelerating Clinical  
Data Exchange™

## Protect and retain your revenue against audits and clinical denials

### MRO Audit Manager

#### It's 2023. Do you know where your audits are?

MRO Audit Manager eliminates the guessing game and places the who, what, and when of audits at your fingertips. In a single solution, you can track the status and financial impact of every payer-related audit. Maximize revenue retention with our audit workflow automation and collaboration tools. Audit Manager meets your unique needs with configurable workflows that improve transparency and cross-department partnerships.

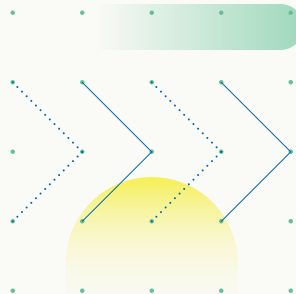

#### Boost efficiency and collaboration while easing staffing headaches

Check and communicate about any audit, anywhere in your process. Facilitate collaboration with user notifications, messaging, and department-specific data views sorted by provider, payer, location, denial reason, and more.

Mitigate staff shortages, reduce errors, and increase efficiency by automating manual processes and tasks. Audit Manager helps you save time and easily prioritize work to meet every deadline.

Watch your quality initiatives gain traction when you use Audit Manager to track trends and boost revenue integrity. Turn to scorecards and dashboards for a high-level view, or dive into the details — all in one place.

#### Audit Manager key features

- Configurable workflows
- Secure document exchange
- Auditor connectivity
- Collaboration tools
- System agnostic
- Interoperability with RCM
- Root-cause analysis
- Department-specific data views

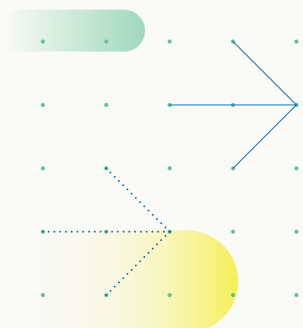

#### We are your expert partner

Understanding the ever-changing demands of healthcare is our business. MRO brings deep knowledge of the industry landscape to help you maximize revenue retention.

#### Our audit experience

- \$1.2B average annual at-risk revenue
- 185k audits managed annually
- 80% of clients 10+ years
- 1,000+ users

## With Audit Manager, you can:

- Improve cross-departmental collaboration
- Grasp financial impacts across payers
- Automate manual processes and tasks
- Track audits' status and outcomes
- Boost productivity and efficiency
- Shorten turnaround time
- Easily prioritize and track work
- Meet deadlines and payer contract terms

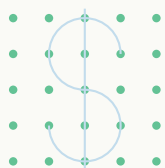

## Monitor financial success with business intelligence

Take a more comprehensive view of revenue won, lost, and at risk with Audit Manager. It empowers you with information about performance, risk, and financial impact across all payer audits — all in one efficient, secure solution.

Conduct financial reconciliations, evaluate outcomes, identify risks, and track appeal activity. Trust Audit Manager to expose areas of financial risk and show where you can reduce revenue leakage.

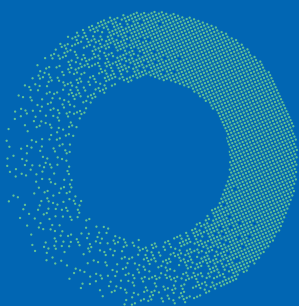

Dig into root-cause analysis across all your systems with reporting and analytics features. Audit Manager provides interoperability where you need it — in electronic health records (EHR) systems, patient financial systems, digital payer communication, and more.

## Potential client outcomes

- **285%** ROI over three years
- **80%** faster audit processing
- **66%** faster audit request intake
- **100%** on-time audits
- **50%** of manual audits automated
- **\$2.24M** at-risk dollars identified

## MRO is committed to your success

MRO leads the industry in providing solutions that protect, defend, and retain your revenue against audits and clinical denials, giving you more time to focus on your mission.

Over 200,000 providers across the U.S. rely on our innovative technology and services to improve their performance. Discover how you can maximize your revenue retention with MRO Audit Manager.
